Discontinuous Galerkin (DG) methods are a class of finite element methods using completely discontinuous basis functions, which are usually chosen as piecewise polynomials. Since the basis functions can be completely discontinuous, these methods have the ex-. Abstract. In this paper, we present an overview of the evolution of the discontinuous Galerkin methods since their introduction in by Reed and Hill, in the framework of neutron transport, until their most recent developments. Discontinuous Galerkin Methods for Elliptic Problems.- Analysis of Finite Element Methods for Linear Hyperbolic Problems.- Software for the Parallel Adaptive Solution of Conservation Laws by Discontinuous Galerkin Methods properties of the discontinuous Galerkin computational methods with the availability of extensive accompanying Matlab based implementations allows students to gain first-hand experience from the beginning without eliminating theoretical.
