A new study backs parent reports that sensory integration therapy improves daily function in children with autism. The research, led by occupational therapists at Philadelphia's Jefferson School of Health Professions, appears online in the Journal of Autism and Developmental Disorders.

Drawing on years of experience in education and pediatric occupational and physical therapy as well as the experience of a parent of a child with Sensory Processing Disorder, the authors of Sensory Processing created this resource to.

OTs use something called sensory integration therapy, which aims to help kids reach an ideal level of sensory regulation. This is accomplished through physical contact and movement like spinning, crashing, and jumping, all which provide therapeutic sensory input. Sensory integration (SI) therapy should be provided by a specially trained occupational therapist (OT). The OT determines through a thorough evaluation whether your child would benefit from SI therapy.
